Fetch receipts from Bankgirot

Anna-Karin Ettik Åsén - 2024-09-11 - Comments (0) - Application management

Receipts are automatically retrieved when you connect to Bankgirot. The time intervals before a receipt is retrieved are configured in the **Profile** you use. This function can also be turned off.

Receipts can be downloaded manually, by clicking on **Actions** in the main menu and selecting **fetch receipt(s)**. If there are receipts available, the status of the relevant files will be updated. If there are no receipts available, a message will be displayed.
