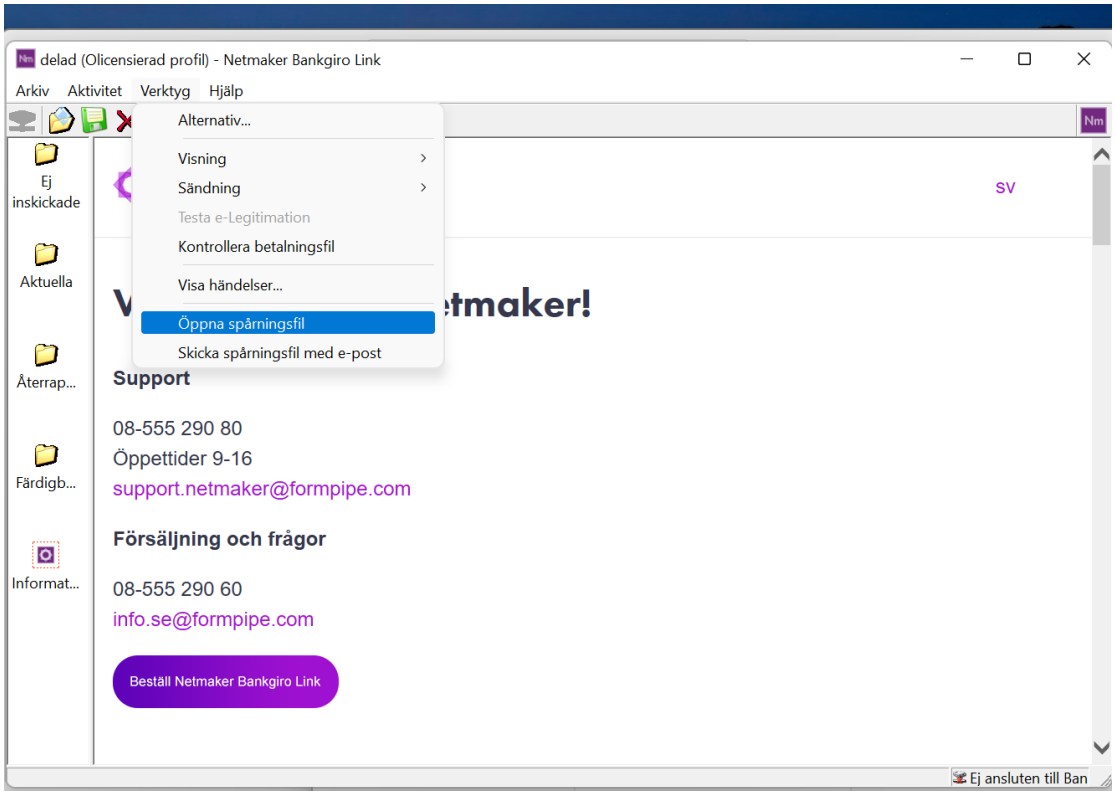
How to find your log file

Sebastian Ohlsson - 2023-10-04 - Comments (0) - Application management


When you need support we will need to look at your log file. You can get your log file from the Netmaker application by clicking “Verktyg” and then selecting “Öppna spårningsfil”.
You will need to save the log file as a .txt-file and then attach it when you create a ticket to our support.
